EASY**XLS** Java Reader/Writer Minimum System Requirements

**In order to install and use Java Reader/Writer component the following are the minimum system requirements.**

Hardware Requirements:
- Processor: Minimum Pentium 2 266 megahertz (Mhz)
- RAM: 128 megabytes (MB) (256 MB or greater recommended)
- Hard disk space required: 5M
- Running with less memory may cause disk swapping which has a severe effect on performance

Software Requirements:
The basic requirement is that the Java(TM) Runtime Environment 8 or above on your computer. You can install the Java(TM) Runtime Environment on almost any computer that runs one of the following operating systems:

- Windows 11
- Windows 10
- Windows 8
- Windows 7
- Windows Vista
- Windows XP
- Windows Server 2022
- Windows Server 2019
- Windows Server 2016
- Windows Server 2012
- Windows Server 2008

- Oracle Linux 5.5+ and above
- Red Hat Enterprise Linux 5.5+ and above
- Suse Linux Enterprise Server 15 (8u201 and above)
- Suse Linux Enterprise Server 10 SP2+ and above
- Ubuntu Linux 12.04 and above

- macOS 12(8u311 and above)
- macOS 11 (8u281 and above)
- OS X 10.9 and above
- OS X 10.8.3 and above

Notes: **1**. If your application runs on server, the requirements are for the server, but if your application is an applet, the applet is downloaded on the client machine and the requirements are for the client.

2. If your application handles large amount of data in Excel files than the memory usage must be increased for the Java(TM) Runtime Environment using the following parameter: -mx256m
